

- Provide a receptacle for swimmers to discard masks as they enter the water and disposable masks for swimmers to wear as soon as they exit the water.

Officials and Timers

- The referee, starter, and stroke and turn officials should space out as much as feasible corresponding to various pool configurations.
- Sanitize any equipment before use (e.g., podium, microphone, etc.)
- Timers should keep ample space from the blocks at the start of the race and only move up to the pool's edge at the end of the race to stop their watch and/or push their button. Then they should move back to their original position.
- Consider using only one timer per lane.
