## Exporting Only the Masters Results from a Mixed Meet (both Masters and USA Swimming members)

Occasionally you might receive results from a meet that contained participants from both USA Swimming and USMS. We don't want USA Swimming members to be uploaded to the USMS Meet Results database. There is a way to separate the Masters swimmers from the age-group swimmers in the Hy-Tek software.

You need the full meet backup to do this. The full meet backup is a file whose name begins with "Swmm3Bkup" or "Swmm4Bkup." First, save this file somewhere on your hard drive.

## From the Hy-Tek Meet Manager software:

Locate the zipped Backup file and Open it

Next you need to create a fictitious club called "USMS." You will assign all of the Masters swimmers to this fictitious club:
