

Selby Aquatic Center Lightning Policies

WARNING SIGNAL

A warning signal (one long 15 second horn blast) will sound and strobe lights will activate when a potentially dangerous weather situation is approaching. The strobe lights are mounted on the top of the Aquatic Center. If the strobe lights are activated, a potentially dangerous weather situation exists.

PROCEDURES

All activities in the Aquatic facility will pause immediately and patrons must leave the pool deck. It is recommended that Selby Aquatic Center patrons seek shelter in their cars or in the locker rooms. Patrons should avoid areas that are higher than the surrounding landscape. All patrons must wait until the ThorGuard ® Lightning Prediction System performs an All Clear Signal before returning to the pool deck.

ALL CLEAR SIGNAL

The All Clear Signal (three short horn blasts, two seconds apart) will sound, and the strobe lights will deactivate. After the All Clear Signal sounds and the strobe light deactivate, Selby Aquatic Center patrons may resume their activities.
